WORK EXPERIENCE

Software Engineering Intern

[April 2025 - August 2025]

IQC Security Consultancy, Ermont, France

- Contributed to both frontend and backend development in a full-stack environment.
- Built responsive and interactive UIs using React, TypeScript, and modern JavaScript (ES6+), incorporating Redux, Tailwind CSS, Bootstrap, and Framer Motion for state management and animations.
- Developed and consumed RESTful APIs using ASP.NET Core for backend services, including authentication, CRUD operations, and business logic layers.
- Implemented front-end and API security best practices to prevent vulnerabilities like XSS, CSRF, and unauthorized access.
- Optimized front-end performance through lazy loading, code splitting, and responsive design.
- Participated in CI/CD workflows using Git and GitHub/GitLab; conducted peer code reviews and wrote automated tests.
- Maintained detailed technical documentation for UI components, API endpoints, and development workflows.
- Created reports and dashboards to help leadership track growth and performance.

SKILLS

Languages: JavaScript, SQL, TypeScript, Python, C++, Java, C#

Frameworks: React, Node.js, Express, MongoDB, ASP.NET Core

Visualization Tools: Power BI, Excel (PivotTables, Power Query), Tableau

Databases: MongoDB, PostgreSQL

Version Control: Git, GitHub

Others: REST APIs, JWT, Axios, React Query, Postman, MUI, TailwindCSS, Docker (basic)

Statistical Analysis: Regression, Hypothesis Testing, A/B Testing

Data: Transforming, cleaning, and optimizing large datasets for analysis and reporting

Microsoft Office: Word, Excel, Powerpoint

Soft Skills: Communication, Troubleshooting, Team Collaboration, Documentation

PROJECTS

● Social Media Platform | Solo Project | [Github Link](#) | [Live URL](#)

Tech Stack: React, TypeScript, Node.js, Express, MongoDB, Mongoose, Tailwind CSS, shadcn/ui, React Query, Axios, Zod, JWT

Project Summary: This is a full-featured MERN stack social media platform designed for faith-based community engagement. It includes dynamic content sharing, user interaction features, and authentication flows, all implemented with industry best practices for frontend architecture, backend structure, and API security.

Key Features:

- **JWT Auth with Refresh Tokens:** Secure login system using HttpOnly cookies and Axios interceptors.
- **Profile Management:** Edit profile, upload image, followers/following list.
- **Post Features:** Create posts, like, comment, with real-time UI updates.
- **Follow/Unfollow Users:** Instant toggle with cache updates via React Query.
- **Zod Validation:** Type-safe validation on both frontend and backend.
- **Modular Backend:** Express backend with controllers, services, and routers.
- **Error Handling:** Centralized error middleware with custom error classes.
- **Optimistic UI Updates:** Seamless user experience using React Query caching.

PROJECTS

● Inventory Management System | [Github Link](#)

Tech Stack: ASP.NET Core MVC, C#, SQL Server, Entity Framework, Bootstrap

Project Summary: A self-built full-stack inventory management application designed to streamline product, sales, and stock operations. It features secure authentication, automated stock updates, and a relational SQL database schema, following the MVC architecture for scalability and maintainability.

Key Features:

- **Product & Category Management:** CRUD operations for products, categories, suppliers, and customers.
- **Stock Tracking:** Automatic stock updates after each sale and purchase transaction.
- **Sales & Customer Records:** Track customer orders, invoices, and payment history.
- **Role-Based Access:** Admin vs. User-level permissions for secure operations.
- **Reporting:** Generate sales and inventory reports for business insights.
- **Responsive UI:** Built with Bootstrap for smooth user experience.

● Appointment Booking Platform | Open Source | [Github Link](#)

Tech Stack: React, TypeScript, Node.js, Express, MongoDB, Zod, MUI, React Query, Day.js, Axios, Vite

Project Summary: A full-stack appointment scheduling system enabling consultants to define availability and users to reserve slots. It features slot reservation logic, cron-based automation, and admin-level conflict resolution for appointments.

Key Features:

- **Consultant Slot Management:** Consultants can create or remove availability slots based on their schedule.
- **Appointment Automation:** Auto-generates future appointment slots weekly or bi-weekly via cron jobs.
- **Conflict Prevention:** Prevents unavailability changes when active bookings exist.
- **Admin Control:** Allows cancellation or reassignment of appointments by admins.
- **Modular APIs:** Clean RESTful APIs for slot and appointment management.
- **Modern UI:** Responsive layouts built with MUI and React Hook Form.

ACADEMIC CREDENTIALS

B.Sc. in Civil Engineering Khulna University of Engineering & Technology, Khulna CGPA: 3.41 (out of 4.00)	[2024]
Higher Secondary School Certificate Kushtia Govt College, Kushtia GPA: 5.00 (out of 5.00)	[2018]
Secondary School Certificate Kushtia Govt Girls High School, Kushtia GPA: 5.00 (out of 5.00)	[2016]

CERTIFICATION

Data Analysis Live Course Certificate Issued by: 10 Minute School Skills Covered: Excel, PowerBI, SQL, and Python-based data analysis techniques with hands-on projects and assignments	[Issued: July 1st, 2025]
